SUBJECT INDEX TO VOLUME 35

(abs) = abstract (E) = editorial

Abrodil, an experimental investigation (abs), 572
Abscess on concave surface of liver, roentgen diagnosis, 65
Acetabulum, intrapelvic protrusion of (abs), 840
Acids, modification of radiosensitivity by means of readily penetrating, 230
Allen, Bundy, 1885–1935, obituary (E), 268
  portrait, 268
American Board of Radiology, diplomates of, 114
American College of Physicians, notice of meeting, 113
American Radium Society (E), 824
  program of meeting, 551
  report of Advisory Committee on X-ray and Radium Protection, 828
  report of Committee on Education and Publicity, 829
  report of Research and Standardization Committee, 828
American Roentgen Ray Society, report of Committee on Legislature and Public Policy, 694
  resolutions presented by Committee on Legislature and Public Policy, 695
Anemia, pernicious, atrophy of mucous membrane of stomach as seen roentgenologically in (abs), 420
Aneurysm, large, of descending thoracic aorta with retropsoas extension, 59
  of pulmonary artery, four cases (abs), 417
Aorta, calcification of, as seen in roentgen spectrogram (abs), 417
  descending thoracic, large aneurysm of, with retropsoas extension, 59
  proportional roentgenologic measurements of (abs), 416
Aortitis, syphilitic (E), 264
Apparatus simplifying technique of administration of opaque enemas, especially for mucosa (abs), 571
Appendicitis, chronic, roentgen diagnosis (abs), 423
Arteriography (abs), 717
  arteriovenous fistula involving the common femoral artery identified by (abs), 132
  pulmonary, experimental study (abs), 705
Arthritis, chronic, roentgen aspects, 156
  chronic, roentgen changes in, 645
  synovial membranes in various types of, study of differential stains, 740
Arthrokatadysis of hip joint (abs), 130
Association of German Roentgenologists and Radiologists of Czechoslovakian Republic, 274
Astragalus and scaphoid, congenital fusion of (abs), 714
Azygos lobe, pathology of, and interpretation of double stripe (abs), 703
  vein, accessory pulmonary lobe of, 630

Back, disabled, pathologic basis for (abs), 713
Basedow's disease: See Goiter, exophthalmic
Bases, modification of radiosensitivity by means of readily penetrating, 230
Bechterew's disease, roentgen appearance of pelvis in (abs), 839
Béclère, Antoine, homage to, 696
Biopsy, aspiration, advantages and limitations of, 245
  electrosurgical, 248
  incisional, 238
Bladder, study of fine structure of calculi of (abs), 427
  tumors, five year results of suprapubic radium implantation (abs), 852
  urinary, diverticulum of (abs), 428
Blebs, emphysematous, 324
Blood, effect of roentgen rays on catalase content of (abs), 141
  picture, effect of borderline rays on fall of leucocytes and on blood picture (abs), 574
Body, entire, roentgen irradiation of, 670
Bone, changes in, in chronic fluorine intoxication, roentgenographic study, 577
  defects in, how do they heal? (abs), 848
  interference with growth of, and with development of breast as result of roentgen irradiation in childhood and youth (abs), 719
  lesions, roentgen study of, in malignant lymphogranuloma (abs), 716
  localized focal atrophy of, in hypophyseal and ovarian disturbances (abs), 130
  marrow, Hodgkin's disease of, without apparent involvement of lymph nodes, 73
  metastases to, from cancer of breast, effect of ovarian irradiation on, 384
  Paget's disease of, sarcoma formation in (abs), 716
  sarcoma, etiology and roentgen diagnosis (abs), 717
  tumors, primary malignant, differential diagnosis (abs), 717
  tumors, value of preoperative irradiation in (abs), 720
Bones, large, long, of extremities, tuberculosis of shaft of (abs), 716
  long, epiphyseal separation of (abs), 709
  of hand and foot, hereditary fusion of (abs), 849
Book Reviews
  Radium Treatment of Skin Disease, New Growths, Diseases of the Eyes, and Tonsils. By Francis H. Williams, 120

Das Ventrikulogramm. III. Teil. Dritter und vierter Ventrikel. Von Erik Lysholm, Bertil Ebenius, Knut Lindblom and Hans Sahlstedt, 120
Röntgenologische Beobachtungen über die Ossifikation der Patella. Von Hans Hellmer, 121
Röntgenology: The Borderlands of the Normal and Early Pathological in the Skiagram. By Alban Köhler. Translated by Arthur Turnbull, 410
The 1935 Year Book of Radiology. Diagnosis, edited by Charles A. Waters; Therapeutics, edited by Ira I. Kaplan, 411
The Principles and Practice of X-Ray Therapy. By Ffrangcon Roberts, 411
Classical Contributions to Obstetrics and Gynecology. By Herbert Thoms, 412
Skin Cancer: A Clinical Study with Special Reference to Radium Treatment. By A. H. Wolfgang Magnusson, 554
Agents of Disease and Host Resistance. By Frederick P. Gay, 555
Untersuchungen über die Möglichkeiten einer dreidimensionalen röntgenographischen Abgrenzung inneren Organe des menschlichen Körpers. By Carl Wegelius, 555
La roentgenothérapie des fibromyomes de l'utérus et des métropathies hemorragiques. By Paul Gibert, 556
L'Action des rayons ultra-violets et des rayons X sur les nerfs périphériques. By Jacques Audiat, 556
A Textbook of Roentgenology: The Roentgen Ray in Diagnosis and Treatment. By Bede J. Michael Harrison, 830
Atlas der normalen Ossifikation der menschlichen Hand. Von F. Siegert, 831
La broncografia en el estudio de la afecciones del torax. By Raul P. Blanco and Federico G. Capurro, 831
Clinical Miscellany. By Members of the Staff of the Mary Imogene Bassett Hospital, Cooperstown, New York, 832
Free Medical Care. Compiled and edited by E. C. Buehler, 832
The Liverpool Medico-Chirurgical Journal, 1935, *43*, Part 1, 832
BORDERLINE RAYS, effect of, on fall of leucocytes and on the blood picture (abs), 574
BRAIN, roentgen demonstration of cysticercus of, in epileptic attacks (abs), 286
roentgenogram of third and fourth ventricle of (abs), 286
tumors, place of radiation in treatment of cerebellar medulloblastomata, 429
BREAST, cancer, distribution of metastases of (abs), 718
cancer, effect of ovarian irradiation on bone metastases of, 384
cancer, place of interstitial irradiation in, 348
cancer, primary operable, effect of preoperative irradiation, 359
cancer, ten years of surgery for (abs), 851
carcinoma, artificial menopause in (abs), 136
carcinoma, inoperable, recurrent and metastatic, treatment, 371
carcinoma, radium therapy in bone metastases of (abs), 720
female, roentgen study of (abs), 702
indications for radical surgery of, 344
interference with development of, and with growth of bone, as a result of roentgen irradiation in childhood and youth (abs), 719
male, carcinoma of (abs), 719
BRONCHIECTASIS, bronchography and (abs), 704
roentgen picture of (abs), 704
some observations on (abs), 704
BRONCHOGRAPHY in bronchiectasis (abs), 704
BULLAE, emphysematous, 324
BURSAE, tumors of (abs), 845

CALCIFICATION of aorta as seen in roentgen spectogram (abs), 417
CALCULI in ureterocele, typical roentgenogram in (abs), 707
ureteral, rectification of errors in diagnosis of movement of, 70
urinary, study of fine structure of (abs), 427
CALVARIUM, osteolytic lesions involving, 9
CANCER from leukoplakia buccalis (abs), 719
methods of palliative surgical treatment (abs), 852
of breast, distribution of metastases of (abs), 718
of breast, effect of ovarian irradiation on bone metastases of, 384
of breast, place of interstitial irradiation in, 348
of breast, primary operable, effect of preoperative irradiation, 359
of breast, ten years of surgery for (abs), 851
of cervix uteri, histological classification, and relation between growth structure and results of radium treatment (abs), 708
of cervix uteri, treatment of (abs), 851
of pharynx, tonsil, larynx and paranasal sinuses, fractional or divided dose method in treatment of (abs), 850
of rectum, results obtained at Radium Institute of Paris in radiation therapy of (abs), 569
of rectum, results of treatment obtained at Experimental Medical Institute of Buenos Aires (abs), 570
of skin, inaccessible, technique for roentgen irradiation of, 93
of stomach (abs), 567
of thyroid, management of (abs), 851
of uterus, results of radium therapy in (abs), 568
prostatic, treatment (abs), 135
roentgen differentiation between, and diverticulitis of sigmoid (abs), 839
treatment results in, as shown in twelve year survey at Evanston Hospital (abs), 852

Carcinoma, gastric, value of polysography in early diagnosis (abs), 576
gelatinous, of duodenum, case of (abs), 568
giant rugae resembling, 204
metastatic, in bone, union of spontaneous fractures caused by (abs), 849
of breast, artificial menopause in (abs), 136
of breast, inoperable, recurrent and metastatic, treatment, 371
of breast, radium therapy in bone metastases of (abs), 720
of esophagus (abs), 702; (abs), 719
of male breast (abs), 719
of mouth, comparison of apparent end results in cases of, in relation to length of follow-up (abs), 849
primary, of female urethra, radium in, 259
primary, of jejunum (abs), 422
small, of stomach, roentgen diagnosis (abs), 567
Catalase content of blood, effect of roentgen rays on (abs), 141
Cerebrum, visualization of vessels of, by direct intracarotid injection of thorium dioxide (thorotrast), 188
Chadwick, James, portrait, 111
Chaoul, roentgen therapy by method of (E), 101
Chest, choice of certain technical factors in roentgenography of, 534
roentgen examination of, note on use of opaque plastic, 279
survey of roentgenographic technique in, 526
Children, anatomy and physiology of gallbladder in (abs), 425
Cholangiography (E), 822
Cholecystography, differentiation of confusing shadows in (abs), 424
"double-oral" method for, 200
Circulation, total, of living frog, roentgen procedure for studying (abs), 141
Clark, William L. 1876–1936, obituary (E), 270
portrait, 270
Clavicle, syphilis of, report of five cases (abs), 710
Cleidocranial dysostosis, familial (abs), 710
Coarctation of aorta in infant (abs), 705
Colon, roentgen appearance of mucosa of, in pathological conditions (abs), 422
value of double contrast enema in diagnosis of early neoplastic lesions of (abs), 838
Coxa plana and related conditions of hip (abs), 840
Craniopathy, metabolic, 30
Curie-Joliot, Irene, portrait, 111
Cyst formations of skull (abs), 702
simple, of pleura, 53
Cystic disease, congenital of lungs, 44, 604
Cysticercus of brain in epileptic attacks, roentgen demonstration of (abs), 286

David Anderson-Berry prize, 113
Diabetes, treatment by radiotherapy, 813
insipidus and osteitis deformans (abs), 131
Diagnothorine, simple technique for roentgenographic and stereoroentgenographic study of mucous folds with (abs), 571
Diphtheria carriers, roentgen rays as means of combatting (abs), 850
use of roentgen rays in treatment of (abs), 718
Diverticula of pericardium, inflammatory (abs), 566
Diverticulitis, roentgen differentiation between, and cancer of sigmoid (abs), 839
Diverticulum of duodenum, pictures simulating (abs), 420
of urinary bladder (abs), 428
Dosage in teleradium treatment at Radiumhemmet (abs), 575
Duodenum, diverticulum of, pictures simulating (abs), 420
extrabulbar ulcer of (abs), 838
gelatinous carcinoma of (abs), 568
papilloma of, 208
redundant, clinical significance (abs), 837
roentgen visibility of Vater's papilla in subject with niche of (abs), 423

Eastern Conference of Radiologists, report of meeting, 403
Echinococcus disease of liver and spleen, roentgen demonstration of path of perforation of (abs), 424
Ectrodactylia, inheritance of (abs), 711
Editorials
Roentgen therapy by the method of Chaoul, 101
Ralph Vincent Robinson, 1884–1935, 106
Heinz Langer, 1888–1935, 106
Harry Bernard Podlasky, 1883–1935, 107
Syphilitic aortitis, 264
Classification of physiologic or pathologic effects of irradiation (roentgen rays or radium), 266
Bundy Allen, 1885–1935, 268
William L. Clark, 1876–1936, 270
Roentgen therapy of acute inflammations and infections, 399
The neutron, 543
Pyogenic osteomyelitis of the spine, 690
Cholangiography, 822
American Radium Society, 824
Effect of borderline rays on fall of leucocytes and on the blood picture (abs), 574
of fractionating on the late effect, animal experiments (abs), 575
of irradiation, classification of physiologic or pathologic (E), 266
of radium chloride injections, preliminary report (abs), 571
of radium irradiation on electrophoretic velocity, viability and pH of *Escherichia coli* suspensions, 392
of roentgen irradiation on development of *Mesotaenium caldariorum* (abs), 137
of roentgen irradiation on esophagus and trachea (abs), 134

of roentgen irradiation on experimentally produced polycythemia in rats, with special reference to blood and bone marrow, 786
of roentgen rays on catalase content of blood (abs), 141
of roentgen rays on the liver (abs), 673
EFFUSIONS, pleural, three zones of simple, 57
EMPHYSEMA, pulmonary, important sequel of chronic lung lesions (abs), 415
EMPHYSEMATOUS BLEBS and bullae, 324
ENCEPHALOGRAPHY, cerebral roentgenoscopy as aid in, 790
technique of, 78
ENDOCRINE, DISORDERS, pre-adult, practical value of roentgenography of epiphyses in diagnosis of, 752
ENEMA, double contrast, diagnostic value (abs), 838
opaque, apparatus simplifying technique of administration of, especially for mucosa (abs), 571
EPILEPTIC ATTACKS, roentgen demonstration of cysticercus of brain in (abs), 286
EPIPHYSES, practical value of roentgenography of, in diagnosis of pre-adult endocrine disorders, 752
separation of, of long bones (abs), 709
EPIPHYSIS for lesser trochanter, 540
for symphysis pubis, does such exist? 541
proximal, of humerus, senile structural changes in (abs), 712
EPITHELIOMATA of lower rectum and anus (abs), 424
ERYSIPELAS CARCINOMATOSUM resembling radiodermatitis, 804
Escherichia coli, effect of radium irradiation on electrophoretic velocity, viability and pH of suspensions of, 392
ESOPHAGUS, carcinoma of (abs), 719
carcinoma and sarcoma of (abs), 702
effect of roentgen irradiation on (abs), 134
localization of bones in, by roentgenoscopy (abs), 702
ring-shaped images in neoplastic ulcer of (abs), 288
roentgen diagnosis of lesions of (abs), 288
value and evaluation of functional symptoms in cases of neoplasm of (abs), 419
ETHMOIDITIS, relationship between, and ocular disturbances, 215
EXTRAPERICARDIAL FAT BODIES, 40
EYE, relationship between ethmoiditis and disturbances of, 215
simple and rapid method for localizing metallic splinters in (abs), 143

FASCIAGRAPHY, 747
FASCIAL SPACES, air injection of, 750
FAT BODIES, extrapericardial, 40
FELTY'S SYNDROME (abs), 132
FEMUR, new method for roentgenographic examination of upper end of (abs), 570
roentgen technique for internal fixation of fractures of neck of, 226
FETUS, roentgen measurement of diameter of head of, in utero (abs), 706
FIBROMA, solitary intramural, of pylorus (abs), 421
FILTERING, secondary screening by means of (abs), 137
FINGERS of milkers, characteristic changes in (abs), 711
FISTULA, arteriovenous, involving common femoral artery identified by arteriography (abs), 132
carcinomatous, on basis of chronic osteomyelitis (abs), 131
FLUORINE INTOXICATION, chronic, bone changes in, roentgenographic study, 577
FOODSTUFFS, effect of, on emptying of normal and operated stomach and small intestinal pattern, 306
FOOT, hereditary fusion of bones of (abs), 849
FORAMINA, parietal, hereditary occurrence of enlarged, diagnostic importance, 1
FOREIGN BODIES in esophagus, localization of, by roentgenoscopy (abs), 702
FRACTURES, multiple, associated with blue sclera (abs), 715
of femoral neck, roentgen technique for internal fixation of, 226
of transverse processes of lumbar vertebrae, mechanism of, 468
spontaneous, union, of, caused by metastatic carcinoma in bone (abs), 849

GALLBLADDER, effect of peritoneal irritation on emptying time of (abs), 424
in children, anatomy and physiology of (abs), 425
modified technique for suspected disease of (abs), 424
GALLSTONES, visualization of minute, 656
GASTROINTESTINAL TRACT, contrast media and visualization of inner wall of (abs), 572
importance of roentgen examination of, when gastroduodenal perforation is suspected (abs), 837
practical device for roentgenography of, under roentgenoscopic control, 123
roentgenologic contributions to knowledge of physiology and pathology of (abs), 144
GENITAL ORGANS in men and women, tuberculosis of, roentgen therapy (abs), 569
GOITER, exophthalmic roentgen treatment (abs), 133
GROWTH CENTERS, osteochondritis of (abs), 713

HAAS, method of, size of sella turcica of children and adults as determined by (abs), 563
HAND, hereditary fusion of bones of (abs), 849
HEART, changes in size and shape of, as influenced by increases of intrapulmonary pressure as

shown by kymographic examination (abs), 418
failure, atypical roentgen appearance of pulmonary infarction in patients with, 635
hypertrophy of, in infancy, associated with thickened endocardium and coarctation of aorta (abs), 705
investigation of constancy of movements of, as seen roentgenologically (abs), 417
roentgen diagnosis of calcified thrombus of (abs), 705
roentgen kymography of, 640
roentgenographic studies of, in thyroid hyperfunction (abs), 417
sagittal, movements of, and aortic shadows with respiration (abs), 418
Hemorrhage, functional uterine (abs), 135
Heredity, importance and application of roentgen diagnostic procedures in studies of (abs), 576
Hip, coxa plana and related conditions of (abs), 840
intrapelvic protrusion of acetabulum (abs), 840
lateral view of, 282
Hip joint, arthrokatadysis of (abs), 130
History of roentgen kymography (abs), 418
Hodges, Fred M., honored, 113
Hodgkin's disease of bone marrow and liver without apparent involvement of lymph nodes, 73
Humerus, proximal epiphysis of, senile structural changes in (abs), 712
Hygroma, cystic, of neck (abs), 287
Hypertension, treatment by radiotherapy, 813
Hyperthyroidism, roentgen therapy versus surgery in treatment of (abs), 849
treated by irradiation (abs), 849

Ilium, etiology of condensing osteitis of (abs), 130
Illinois Radiological Society, 409, 829
Induration, plastic, of penis (abs), 708
Industrial diseases, Kienböck's disease of semilunar bone in relation to (abs), 712
Infants, cardiac hypertrophy in, associated with thickened endocardium and coarctation of aorta (abs), 705
chronic pneumonia associated with nutritional disturbances in, 454
exudative pericarditis in, roentgenology and anatomic studies (abs), 416
premature, viosterol in prophylaxis of rickets in (abs), 714
Infections, acute, roentgen therapy (E), 399
roentgen therapy of certain, 145
Inflammations, acute, roentgen therapy, (E), 399
gynecological, roentgen therapy of (abs), 134
International Congress for Light, 552
International Congress of the Scientific and Social Campaign against Cancer, 552
Interns, teaching of radiology to (abs), 570
Intestine, small, effect of foodstuffs on emptying of normal and operated stomach and small intestinal pattern, 306
small, human intubation studies of, 289, 300
small, observations on physiology of, in presence of calcified mesenteric lymph nodes, 316
Intestines, hypertrophic tuberculosis of (abs), 423
lack of contrast filling of cecum and ascending colon in hyperplastic tuberculosis of (abs), 422
Iodipin in lymph vessels after myelography (abs), 133
Iopax, roentgen study of knee joint with (abs), 713
Ischium, tuberculosis of tuberosity of, 490

Jejunum, primary carcinoma of (abs), 422
Joints, tumors of (abs), 845
Joliot, Frederick, portrait, 111

Kaschin-Beck's disease, roentgen picture of (abs), 713
Kidneys, cortical neoplasms, radiation therapy (abs), 135
normal variations in shape of pelves of, with possible pathological significance (abs), 427
technique in urography and roentgen picture in acute renal and ureteral stasis (abs), 707
tuberculosis of (abs), 427
tumors of (abs), 706
urography in 125 cases of acute renal and abdominal conditions (abs), 707
Kienböck's disease of semilunar bone in relation to industrial diseases (abs), 712
Knee, roentgen diagnosis of old lesions of crucial ligaments of (abs), 130
Knee-joint, visualization of, by means of iopax (abs), 713
Kymography, changes in size and shape of heart as influenced by increases of intrapulmonary pressure as shown by (abs), 418
constancy of cardiac movements studied by (abs), 417
of stomach (abs), 419
roentgen, and collapse therapy for pulmonary tuberculosis (abs), 706
roentgen, history of, and modifications of method (abs), 418
roentgen, of heart and great vessels, 640
roentgen, of lungs (abs), 567

Langer, Heinz, 1888–1935, obituary, 106
portrait, 106

roentgen demonstration of path of perforation of echinococcus disease of (abs), 424
LUMBOSACRAL JOINT, congenital defects of, with associated nerve symptoms (abs), 842
posterior luxations of (abs), 842
LUNG, rare case of open cystic (abs), 703
right, middle lobe of, roentgen appearance in health and disease, 721
LUNGS, accessory pulmonary lobe of azygos vein, 630
atypical roentgen appearance of pulmonary infarction in patients with heart failure, 635
chronic lesions of, pulmonary emphysema an important sequel of (abs), 415
congenital cystic, anatomical and roentgen study (abs), 703
congenital cystic disease of, 604
congenital cysts of, 44
emphysematous blebs and bullae of, 324
experimental study of arteriography of (abs), 705
lymphogranulomatosis of (abs), 414
partial filtration in roentgenography of (abs), 136
pathology of azygos lobe and interpretation of double stripe (abs), 703
phenomena of shadow attenuation and summation in roentgenography of, 772
primary sarcoma of (abs), 704
roentgen kymography of (abs), 567
significance of capillary line (abs), 705
stereoroentgenographic studies of apex of (abs), 414
LYMPH NODES calcified mesenteric, observations on small intestinal physiology in presence of, 316
function of lymphatics and, as shown roentgenologically by subcutaneous injection of thorium dioxide (abs), 576
LYMPH VESSELS, iodipin in, after myelography (abs), 133
LYMPHOGRANULOMA, malignant, roentgen study of bone lesions in (abs), 716
LYMPHOGRANULOMATOSIS of lungs (abs), 414
LYSHOLM GRID, progress in roentgen diagnosis with aid of, 697

MACH'S OPTICAL ILLUSION, well marked case of (abs), 144
MALIGNANCY, roentgen treatment of, using filtration equivalent to 5 mm. copper, 334
MARBLE BONES: See Osteopetrosis
MARIE-BAMBERGER'S SYNDROME, genesis of (abs), 840
MASTOID, research on pneumatization of, in twins, 782

MEASUREMENT, direct, of tube voltage in therapy machines by means of a grounded indicator (abs), 137
MEDULLOBLASTOMATA, cerebellar, place of radiation in treatment of, 429
MENOPAUSE, artificial, in carcinoma of breast (abs), 136
Mesotaenium caldariorum, effect of roentgen irradiation on development of (abs), 137
MESENTERY, common (abs), 838
METASTASES, bone, of carcinoma of breast, radium therapy of (abs), 720
of cancer of breast, distribution of (abs), 718
MICROPHOTOMETER, simple photo-electric (abs), 576
MINNESOTA RADIOLOGICAL SOCIETY, 113, 551, 829
MORPHINE SULPHATE, motor effects of single clinical doses of, in normal subjects, 289
MOUTH, carcinoma, comparison of apparent end results in cases of, in relation to length of follow-up (abs), 849
MUCOUS FOLDS, simple technique for roentgenographic and stereoroentgenographic study of, with diagnothorine (abs), 571
MYELOGRAPHY, a complication in (abs), 709
iodipin in lymph vessels after (abs), 133
MYELOMA, endothelial (abs), 845
endothelial, or Ewing's sarcoma (abs), 720
MYXEDEMA in a roentgenologist (abs), 718

NECK, cystic hygroma of (abs), 287
NEMBUTAL in treatment of radiation sickness, 522
NEOPLASMS: See also Tumors
laryngeal, observations concerning (abs), 288
of esophagus and stomach, value and evaluation of functional symptoms in cases of (abs), 419
NEUTRON (E), 543
NOBEL PRIZE awards in physics and chemistry, 111
NOMOGRAM for determining heating voltage values for hot cathode roentgen tubes (abs), 140

OBSTETRICAL DIAGNOSIS, roentgenography in, 77
OBSTETRICS, undistorted radiography in (abs), 426
ORGANS, internal, experimental study on visualization of, by means of thorotrast (abs), 572
OSGOOD-SCHLATTER'S DISEASE, pathogenesis of (abs), 130
OSTEITIS, condensing, of ilium, etiology (abs), 130
deformans and diabetes insipidus (abs), 131
fibrosa localisata of patella (abs), 714
fibrosa of Recklinghausen, heterotopic parathyroid adenoma, metastases of benign adenomatous struma and adenoma of left adrenal in same patient (abs), 847
OSTEOCHONDRITIS, adolescent, of symphysis pubis, with consideration of normal roentgen changes in symphysis pubis (abs), 712

of growth centers (abs), 713
Osteodystrophia fibrosa unilateralis (abs), 131
Osteolytic lesions involving the calvarium, 9
Osteomalacia, significance of hypertrophy and hyperplasia of parathyroid glands in (abs), 137
Osteomyelitis, acute, of patella (abs), 844
chronic, carcinomatous fistula on basis of (abs), 131
of spine, roentgen findings (abs), 131
pyogenic, of spine (E), 690
Osteopathia dysplastica familiaris (abs), 840
Osteopetrosis, case of, complicated by osteogenic sarcoma, 212
Osteopoikilosis, 495
Ovaries, effect of irradiation of, on bone metastases of cancer of breast, 384

Paget's disease of bone, sarcoma formation in (abs), 716
Pan-Pacific Surgical Association, Second Congress, 112
Papilloma of duodenum, 208
Parathyroid glands, significance of hypertrophy and hyperplasia of, in rickets and osteomalacia (abs), 137
Patella, acute osteomyelitis of (abs), 844
osteitis fibrosa localisata of (abs), 714
Pelvis, relaxation of joints of, in pregnancy (abs), 844
roentgen appearance of, in Bechterew's disease (abs), 839
roentgen demonstration of vessels of, in urological cases (abs), 849
Penis, plastic induration of (abs), 708
Peptic ulcer, perforated, results of suture of, as seen roentgenologically (abs), 420
postoperative, clinical and roentgen study (abs), 421
symptomatology of ulcer on greater curvature of stomach (abs), 421
Pericarditis, acute and chronic, roentgen observations (abs), 566
exudative, in infants, roentgenologic and anatomic studies of (abs), 416
Pericardium, inflammatory diverticula of (abs), 566
Pharynx, cancer, fractional or divided dose method of external irradiation (abs), 850
Placenta previa, roentgen diagnosis (abs), 426
Planigraphy, present status of (abs), 143
Pleura, simple cyst of, 53
Pleural effusions, simple, three zones of, 57
Pneumatization, supraorbital, as seen roentgenologically (abs), 286
Pneumonia, chronic, associated with nutritional disturbances in infants, 454
lipoid cell (abs), 415
subacute peribronchiolar (abs), 565
Pneumoperitoneum, oxygen in diagnosis and treatment of tuberculosis of genitalia, intestine and peritoneum (abs), 839
Pneumoventriculography, cerebral roentgenoscopy as aid in, 790
Podlasky, Harry Bernard, 1883–1935, obituary, 107
portrait, 107
Polycythemia, effect of roentgen irradiation on experimentally produced, in rats, 786
Polysograph, value in diagnosis of pathologic processes in stomach (abs), 576
Pregnancy, compound intrauterine and extrauterine (lithopedion) (abs), 426
relaxation of pelvic joints in (abs), 844
Prostate, cancer, treatment (abs), 135
Protection against radiation in medical roentgen departments, ionometric determinations of (abs), 138
arrangement for repacking of radium bombs (abs), 575
Pulmonary arch, widening of, as seen roentgenologically (abs), 417
Pyelovenous reflux, diagnostic importance (abs), 427
Pylorus, solitary intramural fibroma of (abs), 421

Radiation sickness, nembutal in treatment of, 522
Radiations of different wave lengths, results of capillaroscopic, capillarographic and tonometric studies of action of (abs), 574
Radiodermatitis, erysipelas carcinomatosum resembling, 804
Radiological Section, Connecticut State Medical Society, 552, 829
Radiology, teaching of, to interns (abs), 570
Radiosensitivity, modification of, by means of readily penetrating acids and bases, 230
Radium bombs, protection arrangement for repacking of (abs), 575
chloride injections, preliminary report (abs), 571
element pack, advantages and disadvantages, 508
emanation baths, amount of energy active in the tissues in (abs), 573
irradiation, effect of, on electrophoretic velocity, viability and pH of *Escherichia coli* suspensions, 392
pack, five gram, 498
packs, advantages and disadvantages, 513
Rays, artificially and naturally produced, separate and combined use of, 96
Rectum, cancer, results obtained at Radium Institute of Paris in radiation therapy of (abs), 569
cancer, results of treatment obtained at Experimental Medical Institute of Buenos Aires (abs), 570
lower, and anus, epitheliomata of (abs), 424
Reyn, Axel Lauritz (abs), 573
Ribs, roentgen study of normal and pathological satellite shadows of (abs), 564
Rickets in premature infants, viosterol in prophylaxis of (abs), 714

significance of hypertrophy and hyperplasia of parathyroid glands in (abs), 137
ROBINSON, RALPH VINCENT, 1884–1935, obituary, 106
portrait, 106
ROENTGEN apparatus, electrical train of events in high tension circuits of (abs), 138
apparatus, regulated in high voltage circuit (abs), 575
apparatus, safety device for, 834
departments, ionometric determinations of protection against radiation in (abs), 138
diagnosis, progress in, with aid of Lysholm grid, 697
diagnostic procedures, importance and applications of, in studies of heredity (abs), 576
film, importance of fog in determining quality of (abs), 139
film, serial, testing of emulsions of same manufacture as to constancy of most important properties (abs), 142
film, when is increase of sensitivity of, an actual step forward (abs), 142
films, efficient illumination, development and viewing boxes (abs), 141
films, method for correct viewing of (abs), 136
films, some experiments on toning (abs), 141
irradiation, fractional, animal experiments on effect of, on late effect (abs), 575
irradiation, fractional or divided dose method of external, in treatment of cancer of the pharynx, tonsil, larynx and paranasal sinuses (abs), 850
irradiation in childhood and youth, interference with growth of bone and development of breast as result of (abs), 719
irradiation of entire body, 670
mutations, genetic foundations of (abs), 575
rays, efficiency of scattered ray grids (abs), 138
rays, scattered, determination of filter-working of filters for, and of elimination of scattered rays by other methods (abs), 142
sensitivity, absolute chemical limitation of organic substances for testing (abs), 576
sickness, liver extract as remedy for, 681
therapy by method of Chaoul (E), 101
therapy machines, direct measurement of tube voltage in by means of grounded indicator (abs), 137
tube, electrical phenomena of high tension circuit of (abs), 140
tube, hot cathode tubes with self-regulating energy control (abs), 139
tube, hot cathode valves with a light trap and a light regulator (abs), 140
tube, improved high voltage, 818
tube, measurement of voltage on (abs), 139
tube, new continuously evacuated, for deep therapy (abs), 139
tube, nomogram for determining heating voltage values for hot cathode (abs), 140
tube with rotating anode and high temperature radiative cooling (abs), 138
tubes, differences between "Kestral" tube and other (abs), 144
tubes, fundamental differences between loading of Kestral tubes and those of other construction (abs), 144
ROENTGENOGRAM, effect of structure of focus on light and dark streaks in (abs), 141
importance of selectivity of grids as regards contrast in (abs), 141
mathematical concept of contrast in (abs), 144
measurement of contrast in (abs), 142
real and apparent in (abs), 142
ROENTGENOGRAPHY in obstetrical diagnosis, 777
integrating and automatic stabilizing apparatus for (abs), 142
of chest, choice of certain technical factors for, 534
of chest, survey of technique for, 526
of lungs, partial filtration in (abs), 136
of nasal sinuses, economical procedure in, 559
soft tissue, 474
soft tissue, new method of, 750
thorium hydroxide sols as opaque media in, 194
ROENTGENOLOGIST, myxedema in (abs), 718
ROENTGENOSCOPY, cerebral, as aid in pneumoventriculography and encephalography, 790
localization of bones in esophagus by (abs), 702
RUGAE, giant (localized hypertrophic gastritis) resembling carcinoma, 204

SARCOMA, bone, etiology and roentgen diagnosis (abs), 717
chondroblastic, case of (abs), 132
Ewing's (abs), 847
Ewing's, or endothelial myeloma (abs), 720
formation in Paget's disease of bone (abs), 716
of esophagus (abs), 702
of stomach (abs), 421
osteogenic, complicating case of osteopetrosis, 212
primary pulmonary (abs), 704
SCHÜLLER-CHRISTIAN'S DISEASE: See Xanthomatosis
SCLERA, blue, multiple fractures associated with (abs), 715
SCREENS intensifying, lack of definition in (abs), 140
SELLA TURCICA, changes in, in intracranial tumors at a distance from the sella (abs), 563
detailed considerations of roentgen study of (abs), 563
in twins, shape and dimensions of, 782
roentgen diagnosis of tumors in region of (abs), 563
size of, in children and adults as determined by method of Haas (abs), 563
SIGMOID, high and low power roentgenographic differentiation between diverticulitis and cancer of (abs), 839
SILICOSIS (abs), 414
SINUS, maxillary, roentgen and anatomical study, 586

maxillary, roentgen study of malignant tumors of (abs), 286
Sinuses, nasal, economical procedure in roentgenography of, 559
nasal accessory, research on pneumatization of, in twins, 782
paranasal, cancer, fractional or divided dose method of external irradiation in treatment of (abs), 850
Skeleton, changes in, in Schüller-Christian's disease (abs), 845
Skin, inaccessible cancer, technique for roentgen irradiation of, 93
Skull, cyst formations of (abs), 702
secondary tumors of vault of, from roentgen point of view (abs), 564
tuberculosis of flat bones of vault of (abs), 285
Spinal cord, injuries of, and its roots following dislocation of cervical spine (abs), 839
roentgenogram of spinal canal in tumors of, and in osteitis fibrosa (abs), 709
Spine, cervical, injuries of spinal cord and its roots following dislocation of (abs), 839
congenital defects of lumbosacral joints with associated nerve symptoms (abs), 842
congenital fusion of (abs), 842
differential diagnosis between infection and malignancy in cases of dorsal paravertebral mass, 591
giant cell tumor of (abs), 848
non-tuberculous infections of (abs), 712
osteomyelitis and infective spondylitis of, roentgen findings (abs), 131
posterior displacement of fifth lumbar vertebra (abs), 843
posterior luxation of lumbosacral joint (abs), 842
pyogenic osteomyelitis of (E), 690
some pathophysiological peculiarities of function of, 468
Spleen, roentgen demonstration of path of perforation of echinococcus disease of (abs), 424
Spondylitis, infective, of spine, roentgen findings (abs), 131
Stereoscopy, modern roentgen (abs), 571
roentgen, 662
Stomach, atrophy of mucous membrane of, as seen roentgenologically in pernicious anemia (abs), 420
cancer of (abs), 567
contents, influence of variations in reaction and motility of, on reaction and motility of intestinal contents, 300
effect of foodstuffs on emptying of normal and operated, and small intestinal pattern, 306
effect of peritoneal irritation on emptying time of (abs), 424
kymography of (abs), 419
roentgenologic and experimental studies of value of polysograph in pathologic processes in, with special reference to gastric carcinoma (abs), 576
sarcoma of (abs), 421
small carcinomata of, roentgen diagnosis (abs), 567
symptomatology of ulcer on greater curvature of (abs), 421
value and evaluation of functional symptoms in cases of neoplasm of (abs), 419
Stratigraphy, practical accomplishment of (abs), 143
Symphysis pubis, adolescent osteochondritis of, with consideration of normal roentgen changes in (abs), 712
epiphysis for, does such exist? 541
Synovial membranes in various types of arthritis, study by differential stains, 740
Syphilis of aorta (E), 264
of clavicle, report of five cases (abs), 710

Technique, choice of certain factors in, for chest roentgenography, 534
for roentgen irradiation of inaccessible cancer of skin, 93
in urography and roentgen picture in acute renal and ureteral stasis (abs), 707
modern roentgenographic (abs), 143
new method for roentgenographic examination of upper end of femur (abs), 570
of administration of opaque enemas, apparatus simplifying (abs), 571
of encephalography, 78
of roentgenography of nasal sinuses, economical procedure in, 559
practical device for gastrointestinal roentgenography under roentgenoscopic control, 123
roentgen, for internal fixation of fractures of femoral neck, 226
roentgen measurement of fetal head diameter in utero (abs), 706
simple, for roentgenographic and stereoroentgenographic study of mucous folds with diagnothorine (abs), 571
survey of chest roentgenographic, 526
Teleradium treatment, intensity distribution and dosage in, at Radiumhemmet (abs), 575
Tendon sheaths, tumors of (abs), 845
Thorium dioxide, function of lymphatics and lymph nodes as shown roentgenologically by subcutaneous injection of (abs), 576
Thorium hydroxide sols as opaque media in roentgenography, 194
Thorotrast, experimental studies on visualization of internal organs by means of (abs), 572
visualization of cerebral vessels by direct intracarotid injection of, 188
Thrombus, calcified cardiac, roentgen diagnosis (abs), 705
Thyroid, hyperfunction, roentgen studies of heart in (abs), 417
malignancy of, management of (abs), 851
Tissues, soft, new method of roentgenography of, 750
soft, roentgenography of, 474

TONSILS, cancer, fractional or divided dose method of external irradiation in treatment of (abs), 850
TRACHEA, effect of roentgen irradiation on (abs), 134
TRACHEOBRONCHIAL GLANDS, gigantic form of tuberculosis of, in adult (abs), 703
TRAUMA and malignant tumors (abs), 136
TROCHANTER, lesser, epiphysis for, 540
TUBERCULOSIS, hyperplastic, of intestines, lack of contrast filling of cecum and ascending colon in (abs), 422
hypertrophic intestinal (abs), 423
of flat bones of vault of skull (abs), 285
of genital organs in men and women, roentgen therapy (abs), 569
of genitalia, intestine and peritoneum, oxygen pneumoperitoneum in diagnosis and treatment (abs), 839
of shaft of large long bones of the extremities (abs), 716
of tracheobronchial glands in adult, gigantic form of (abs), 703
of tuberosity of ischium, 490
pulmonary, roentgen kymography and collapse therapy for (abs), 706
pulmonary, significant active, in apparently healthy adult (abs), 414
renal (abs), 427
TUMOR, dorsal paravertebral, differential diagnosis between infection and malignancy in cases of, 591
giant cell, of spine (abs), 848
metastasis, studies on (abs), 718
nephrogenic (abs), 706
osteoid-tissue-forming, simulating annular sequestrum (abs), 711
TUMORS, bone, primary malignant, differential diagnosis (abs), 717
bone, value of preoperative irradiation in (abs), 720
brain, place of radiation in treatment of cerebellar medulloblastomata, 429
in region of sella turcica, roentgen diagnosis (abs), 563
intracranial, changes in sella turcica in, at a distance from sella (abs), 563
malignant, and trauma (abs), 136
malignant, of maxillary sinus, roentgen study of (abs), 286
malignant, problem of treatment (abs), 133
of bladder, five year results of suprapubic radium implantation (abs), 852
of tendon sheaths, joints and bursae (abs), 845
renal cortical, radiation therapy (abs), 135
secondary, of vault of skull from roentgen point of view (abs), 564
some discrepancies and pitfalls that occur in clinical work as result of grading of, 795
spinal cord, roentgenogram of spinal canal in, and in osteitis fibrosa (abs), 709
uncommon, roentgen treatment (abs), 136
TWINS, research on pneumatization of nasal accessory sinuses and of mastoid processes and on shape and dimensions of sella turcica in, 782

ULCER, extrabulbar, of duodenum (abs), 838
neoplastic, of esophagus, ring-shaped image in (abs), 288
URETER, calculi of, rectification of errors in diagnosis of movement of, 70
URETERITIS CYSTICA, roentgen appearance (abs), 707
URETEROCELE, concrement formation in, typical roentgenogram in (abs), 707
URETHRA, female, radium in primary carcinoma of, 259
URINARY TRACT, diagnosis of traumatic lesions of, 218
UROGRAPHY, excretory, value of, in diagnosis of traumatic lesions of urinary tract, 218
in 125 cases of acute renal and abdominal conditions (abs), 707
technique in, and roentgen picture in acute renal and ureteral stasis (abs), 707
UTERINE BLEEDING, functional (abs), 135
UTERUS, cancer, results of radium therapy in (abs), 568
cervix, cancer, histological classification, and relation between growth structure and results of radium treatment (abs), 708
cervix, cancer, treatment of (abs), 851

VALSALVA EXPERIMENT, cardiokymogram in (abs), 418
VATER'S PAPILLA, roentgen visibility of, in a subject with duodenal niche (abs), 423
VEINS, direct venography in obstructive lesions of, 485
varicose, of leg, clinical importance of venography in (abs), 132
VENOGRAPHY, direct, in obstructive lesions of veins, 485
in varicose veins of leg, clinical importance (abs), 132
VERTEBRA, fifth lumbar, posterior displacement of (abs), 843
VERTEBRAL BODY, exanthomatosis with involvement of (abs), 715
VERTEBRAL COLUMN: See Spine
VESSELS, cerebral, visualization of, by direct intracarotid injection of thorium dioxide (thorotrast), 188
VIOSTEROL in prophylaxis of rickets in premature infants (abs), 714

XANTHOMATOSIS, changes in skeleton in (abs), 845
with involvement of vertebral body (abs), 715
